I HAD THE TEN ESSENTIALS AND SURVIVED!

Are you prepared and equipped to spend the night outdoors if you get lost?

Many people who have an outdoor misadventure quickly point out that having and using the 10 essentials allowed them to survive!

1. Flashlight, spare batteries and bulb
2. Firemaking kit – waterproof matches/lighter, firestarter/candle
3. Signaling device – whistle or mirror to signal searchers if you become lost
4. Extra food and water – 1 litre/person
5. Extra clothing (rain, wind, water protection and toque)
6. Navigational/Communication Aids (maps, compass, Personal Locator Beacon (PLB) or other alerting device, GPS, charts, cellular phone, hand held radio – fully charged) know how to use these items
7. First Aid Kit and know how to use it
8. Emergency shelter – orange tarp or large orange garbage bag. These can also be used as signaling devices
9. Pocket knife
10. Sun protection (glasses, sunscreen, hat)

Canada

CODE OF RESPONSIBILITY FOR OUTDOOR ACTIVITIES.

Enjoy the outdoors safely.
It's your responsibility.

Each year in Canada, approximately 2,000 outdoor recreation mishaps require ground and inland water search and rescue and many result in injuries and/or death. Many of these incidents are preventable and it is an individual responsibility to be prepared. Complete a trip plan and leave it with someone responsible, ensure that you have the skills required and take the right equipment before heading out.

Canada's search and rescue system uses a combination of public, private and volunteer resources to respond to ground and inland water incidents across the country. As part of this, a network of skilled search and rescue volunteers assists the police and agencies to locate and rescue those in need. These dedicated unpaid professionals are trained in Ground Search and Rescue, Swift Water Rescue, Rope Rescue, Tracking, Avalanche Response and Mountain Rescue.

If you require search and rescue assistance on ground or inland waters, please contact your local/regional police services.

AVOID DEATH AND INJURY IN OUTDOOR RECREATION

Too often people realize too late that the outdoor activity they are involved with could lead to injury and/or death!

Avoid This Situation – Here’s How!

Adjust your plan when circumstances change

- Are you prepared when the weather changes?
- What will you do if you run out of daylight?
- What will you do if your partner or other members of your group become ill or injured?

Prepare for Emergencies

- Will you stay warm and dry no matter what happens?
- Are your ten (10) essentials and other necessary equipment in good working order?
- Have you practised using all your equipment?

Have you:

- checked the weather?
- told someone where you’re going?

Do you:

- know what to do if you get lost?

OUTDOOR TRAVEL TIPS

- Alert the system – carry a device that is appropriate for your activity and location to call or alert others to an emergency situation and know how to use it.
- Be prepared for your chosen recreation – being fit enough to go the distance takes physical preparation. Stick to your turnaround time. Take the proper equipment, have a trip plan and use reference and guide books.
- Always carry the essentials – if necessary, be ready to stay out overnight.
- Complete a trip plan and leave it with a friend – the trip plan explains your destination, the route you are taking, who is in the group and your return time. If you do not return as planned, the friend you left the trip plan with can give the form to the police to initiate a search.
- Never hike alone – hike with a group and keep together. Travel at the speed of the slowest person. If a person becomes separated by going ahead or falling behind, they are more likely to become lost.
- Do not panic – maintain a positive mental attitude if you become lost. Being lost is not dangerous if you are prepared.
- Stay where you are – people who carry on after they become lost usually get further from the trail and further from people who are looking for them. Also, going downhill often leads to natural drainage. Gullies which typically have very thick bush, expansive cliffs and waterfalls make travel and searching more difficult.
- Use signaling devices – blowing a whistle, lighting a fire and staying visible will help searchers find you. Help searchers find you even if you are embarrassed or afraid. Remember that animals will not be attracted to your signals. Searchers may also use planes or helicopters – make yourself visible to them.
- Build or seek shelter – protect yourself from the rain, wind and excessive sun. Be as comfortable as possible, but when it is daylight, make sure you are visible to searchers in helicopters or planes.
- The most common mistake – an individual’s belief that “it could never happen to me” is summed up as EGO. By being prepared, you can enjoy your trip outdoors regardless of what nature throws at you!

The most common mistake...

“It could never happen to me.”
